

### " EtchON LowReflection-Frost Powder "

This Glass Frosting Powder is specially made to have very dilute transparency in the Glass, This frosting powder is mixed with Hydrochloric acid during the frosting process. (See Acid Frosting Operation Instructions)

#### Features

- Low Reflection, stable and simple operation
- Available for Clear flat glass
- Frosting finished within 40-60seconds (at 10-35°C)
- 8-10 m<sup>2</sup>/kg Frosting Capacity
- Mixing ration 1: 0.50 (Powder: Acid)
- Packages : 1 Kg/5 Kg/ 25 Kg
- Validity 2 Years

### " EtchON Quartz-Frost Powder "

This Glass Frosting Powder is specially made for highly-pure silicon-dioxide quartz glass, such as Quartz Halogen, tungsten lamps etc, This frosting powder is only mixed with Hydrochloric acid during the frosting process. (See Quartz Frosting Operation Instructions)

#### Features

- Simple Operation & Fine Frosted appearance.
- Available for quartz Glass
- Frosting finished within 10-25 minutes (at 10-35 °C)
- 8-10 M<sup>2</sup>/kg Frosting Capacity
- Mixing ration 1: 0.30 (Powder: Acid)
- Packages : 1 Kg/5 Kg/ 25 Kg
- Validity 2 Years
